

At Pegasus, expertly trained technicians and the latest technologies are employed to make 100% certain that critical environments meet or exceed the industry's highest regulations for contamination control and cleanroom compliance.

Contaminated critical environments cost companies money, risk fines from regulatory agencies and threaten the systems certifications required by manufacturers. The risk of a compromised cleanroom affects a company's bottom-line. Period.

Critical Cleaning

Through our critical environment cleaning professionals and the use of innovative technology, we make certain your cleanroom environment meets or exceeds the industry's highest regulations for contamination control, maintenance and safety.

Our commitment comes with the industry-leading ISO 9001:2008 certification. Pegasus follows International Organization for Standardization guidelines, reflecting our commitment to continuous process improvement. We offer comprehensive decontamination services across:

- » Cleanrooms
- » Grey space
- » Cold rooms
- » Dry rooms
- » Laboratories
- » Gown rooms
- » Vivariums
- » Biomedical facilities

At Pegasus, we understand the theory of controlled environments and know the importance of cleanroom protocol and adherence to Federal Standards of compliance. Pegasus offers the following in GMP/cleanroom services:

- » Nightly, weekly or monthly service
- » Regular and periodic cleaning
- » Level I, II and III cleaning
- » Aseptic cleaning
- » High-tech cleaning
- » Super-cleans and shutdown cleans
- » ESD floor care and testing
- » Protocol and SOP development
- » H₂O₂ decontamination
